

CLOUD PRE CARBON FILTER (STE)

REPLACEMENT CARTRIDGES / ACCESSORIES

PRODUCT-NO.: 206384

Second stage carbon pre-filter cartridge used with Cloud drinking water filter.

This filter medium is made from coconut shells and delivers a good pre-filtration performance. The activated carbon reduces herbicides, pesticides and turbidity, adsorbs chlorine, VOCs and TTHMs, and is also able to reduce heavy metals such as lead and mercury.

The main features

Large carbon surface area for efficient particle reduction

Good carbon material for better taste and filtration performance

Strict quality control in both temperature and material ensures optimum performance of the carbon block

Hygienic encapsulated cartridge

Easy filter replacement

Type	CLOUD PRE CARBON FILTER (STE)
Part no.	206384

Technical data

Length of filter medium	11 into
Filtration stages	1 Stage
